PROJECTS/ACTIVITIES

- Project Title **Student Portal**-Using Python: (Group Project)
Date: November 2022

Synopsis:

- Built a Student Portal so that Students can log in and register to access their timetable, Study material, and books of interest without Distraction.
- Also to light up the mood a Game Section was also added which includes the games like SOS, Snake-water-Gun, and Tic-Tac-Toe.
- My contribution-I have worked on both the Backend and Frontend of the portal. In the Backend-the login and Registration part using Object Oriented Programming. In Front-end -The Graphic User Interface part, and Linking one window with the other using python Library Tkinter and openpyxl.

- Project Title **Portfolio Website** -Frontend Web Development
Date : July 2023

Synopsis:

- I have created the portfolio website with HTML, CSS, Bootstrap, and JavaScript which provides the visitors with an overview of my background, skills, and interests.
- It also showcases the projects I made and allows easy communication through a contact me section, which includes my social media links, contact number, and contact form.
- The website uses JavaScript to integrate the contact form with Excel and respond when the message is submitted.

- I have integrated the contact form with Excel as a data storage solution ensuring that I can efficiently manage the contact details and messages received through the website.

COMPUTER PROFICIENCY

- Programming Languages: Java, Python
- Database Management: Data Structures and Algorithm-Java
- Software Packages: Graphic user interface using Python Library
- Front-end Web-development: HTML, CSS, Bootstrap, Javascript
